

What our clients are saying...

"Working with Kristin and Align Professional Solutions has been nothing but an absolute pleasure. She is extremely supportive in all areas and always goes the extra mile. I feel completely taken care of and that my best interests are at heart as opposed to feeling like I'm just another number in some faceless organization.

I have been using her VIP services for almost a year and love every service that has been available to me. She and her team, work as a member of my team and speak directly to my clients which takes work off my plate. My clients are all 110% satisfied with the bookkeeping services they receive from us which of course is a direct causation of Kristin and Align. All their work is always flawless and completed in a very timely manner.

I also go to her anytime I need to quote a potential client which has been a huge help as well and takes the guessing work out of it. Plus, she always gives me a boost of confidence because I'm not the best at sales. I've also used her Sales Closer services which I found very helpful. If you're not great at sales and/or don't always have time to do your sales calls, then that's a great feature. I was able to land one of my larger clients because of it.

Their customer service is amazing! As I said Kristin is always very supportive. I know that she genuinely cares about me, my business, and all my clients. That's very important to me. She always responds very quickly too. I've been nothing but happy and fully satisfied with her and her pricing. I recommend her to absolutely everyone because she is so amazing and is also a one-stop shop. Even if you don't need all the services I use, you can pick and choose. She literally has something for any Bookkeeping firm.

I recommend stopping trying to do everything yourself because Align Professional Services has made it so that I can take so much time off my plate that I can just focus on growing my business and keeping my clients happy! Otherwise, I'd be spending all my time doing the day-to-day work whereas now I can grow my business tenfold because of all the freedom of time I have. I'd also much rather outsource to her than go through the grueling process of hiring and managing my own employees.

She has put together the perfect system! Don't think about it, go for it! Seriously, I can't recommend Align Professional Solutions more."
